

Jumbo Transport add a 3rd Hub in Denmark, this time in the South of Jutland

Jumbo Transport now with own Domestic Service – “Your Danish Connection”

Copenhagen, September 2019

Jumbo Transport’s long-term goal has always been to become a self-sufficient logistics provider, where possible. One of the main areas of focus in this regard has been our domestic distribution network, where we have over several years built up a significant volume which enables us to operate our own distribution network throughout Denmark.

To allow us to continue our desire to improve our Domestic Network, we have, as of 1st September 2019, incorporated all activities of a former distribution company in Haderslev within Jumbo Transport.

The introduction of our new hub in Haderslev, working in close cooperation with our existing hubs in Brøndby and Aarhus, have ensured that Jumbo Transport, as of 1st September 2019 offer daily distribution services throughout Denmark.

Our latest hub in Haderslev covers 2000m2 and to further support the development of the hub, additional investments have been made in new trucks and trailers and we have employed Anni and Anders Schondelmeier to manage and drive our new hub forward.

The new management team will be supported by the existing staff and will be operate 24 hours a day. Through the strength of our network, we will connect our distribution centers in Oslo, Malmo, Brøndby, Aarhus and Haderslev with our European hub in Hamburg with daily departures.

We hope our existing customers, as well as new customers will see the benefits of our improved services and will consider Jumbo Transport as a serious alternative for their logistics requirements.
